WARNING: Read Before Using Your Sega Dreamcast Video Game System

CAUTION

Anyone who uses the Dreamcast should read the operating manual for the software and console before operating them. A responsible adult should read these manuals together with any minors who will use the Dreamcast before the minor uses it.

HEALTH AND EPILEPSY WARNING

Some small number of people are susceptible to epileptic seizures or loss of consciousness when exposed to certain flashing lights or light patterns that they encounter in everyday life, such as those in certain television images or video games. These seizures or loss of consciousness may occur even if the person has never had an epileptic seizure.

If you or anyone in your family has ever had symptoms related to epilepsy when exposed to flashing lights, consult your doctor prior to using Dreamcast.

In all cases, parents should monitor the use of video games by their children. If any player experiences dizziness, blurred vision, eye or muscle twitches, loss of consciousness, disorientation, any involuntary movement or convulsion, IMMEDIATELY DISCONTINUE USE AND CONSULT YOUR DOCTOR BEFORE RESUMING PLAY.

To reduce the possibility of such symptoms, the operator must follow these safety precautions at all times when using Dreamcast:

- Sit a minimum of 6.5 feet away from the television screen. This should be as far as the length of the controller cable.
- Do not play if you are tired or have not had much sleep.
- Make sure that the room in which you are playing has all the lights on and is well lit.
- Stop playing video games for at least ten to twenty minutes per hour. This will rest your eyes, neck, arms and fingers so that you can continue comfortably playing the game in the future.

OPERATING PRECAUTIONS

To prevent personal injury, property damage or malfunction:

- Before removing disc, be sure it has stopped spinning.
- The Sega Dreamcast GD-ROM disc is intended for use exclusively on the Sega Dreamcast video game system. Do not use this disc in anything other than a Dreamcast console, especially not in a CD player.
- Do not allow fingerprints or dirt on either side of the disc.
- Avoid bending the disc. Do not touch, smudge or scratch its surface.
- Do not modify or enlarge the center hole of the disc or use a disc that is cracked, modified or repaired with adhesive tape.
- Do not write on or apply anything to either side of the disc.
- Store the disc in its original case and do not expose it to high temperature and humidity.
- Do not leave the disc in direct sunlight or near a radiator or other source of heat.
- Use lens cleaner and a soft dry cloth to clean disc, wiping gently from the center to the edge. Never use chemicals such as benzene and paint thinner to clean disc.

PROJECTION TELEVISION WARNING

Still pictures or images may cause permanent picture tube damage or mark the phosphor of the CRT. Avoid repeated or extended use of video games on large-screen projection televisions.

CAUTION

Sonic Adventure™ is a memory card compatible game (Visual Memory Unit (VMU) sold separately). The number of memory blocks required to save game files varies according to the type of software and content of files to be saved. With this game, 10 blocks are needed to save game files and 128 blocks are needed to maintain the A-Life system used to save Chao creatures. Playing "Chao Adventure" (mini-game) using your VMU requires 128 blocks of free memory. Note that because the saving of all cleared action stages, events, and victorious battles against bosses occurs automatically, never turn OFF the Dreamcast power, remove the memory card unit or disconnect the controller during game play.

ADVENTURE MODE

ADVENTURE FLOW

The central game of Sonic Adventure™ is called the "adventure mode". The adventure mode is comprised of two "areas". One area, called the "Adventure Field", contains a variety of "Events" that are encountered in the course of the overall adventure story. The other area is called an "Action Stage". In an action stage, each individual character must fulfill a unique "goal" in order to clear the stage successfully. The general flow of the game can be illustrated as follows:

CHARACTER SELECTION

↑↓←→+A = Enter, B or X = Cancel

When you select a character, the items "Game", "Instruction" and "Cancel" are displayed. Select one of these items.

Sonic is the only character that can be selected at the start of a new game. The other characters will become available for play as you progress through the adventure story. For details, see p.8.

GAME INSTRUCTIONS

Basic control instructions for the selected character are displayed along with a brief summary of the particular "goal" that the character must meet to successfully clear the action stages. It is recommended that you review this information before playing the game. Press A to continue to the next screen and B or X to return to the previous screen.

STORY SCREENS

These screens provide a short story summary about the selected character. Press B or X to return to the character selection screen.

NOTE: These summaries are not displayed the very first time the character is selected.

ADVENTURE MODE

ADVENTURE FIELD

Because there are no time limits or goals to complete in the adventure field part of the game, feel free to investigate and explore the adventure field as much as you like. However, in order to continue the overall game, it is necessary to find the Level Up Items that grant your character special powers as well as to locate the various action stage entrances whenever your character is in the adventure field.

Each of the three areas within the adventure field contains a "Chao Garden". A Chao garden is a special location designed for raising Chao creatures. For details about Chao creatures, see p. 15.

EVENTS

Whenever you discover a new action stage entrance or meet up with a new character while in the adventure field, an "event" in the form of an FMA (Full Motion Action) sequence is shown. Events occur automatically and while the event is "playing", you are unable to operate your character.

CHARACTERS

Sonic is the only character that can be selected at the start of a new game. You will be able to select other characters as you progress through the game.

The five additional characters in this game are Tails, Knuckles, Amy, Gamma and Big. Each character can be selected immediately following their respective introduction.

BATTLING THE BOSSES

Sometimes a "Boss" will appear in the adventure field after you have successfully cleared an action stage. It is necessary for you to locate and defeat the boss in battle to continue to the next stage. The battle starts as soon as the boss's name and life gauge appear on the screen. Remember, it is important to have at least one ring throughout the battle to prevent your character from dying when attacked. Once the boss's life gauge reaches zero, victory is yours and the battle ends.

CHAO CREATURES

A special feature of Sonic Adventure is the ability for you to raise a unique species of creatures called "Chao". A Chao creature is essentially a "virtual pet" that you first encounter in the form of an egg in the adventure field. If you discover an egg, take it to a Chao Garden, hatch the egg and raise your Chao creature.

You will find one "Chao Garden" in each area of the adventure field. A Chao Garden is a protected enemy-free location specifically designed for raising Chao. All prospective parents, be forewarned! How you raise and care for your Chao will determine not only its physical characteristics but also its behavior and personality. For more information about Chao creatures, see p. 15.

ACTION STAGES

Each character has a different goal that must be met in order to clear the action stages. This goal is displayed at the start of each action stage. The goal of each stage is broken into three levels (A, B, and C) so set your sights on clearing all three levels and good luck!

For details about action stage goals and a diagram of the action stage display for each individual character, see the character introductions on p. 18.

RINGS & BONUS LIVES

A number of rings can be found in each action stage. Your character can survive damage inflicted by an enemy attack as long as they are carrying at least one ring. However, when attacked, they will automatically lose all the rings they were carrying. If attacked when not carrying any rings, your character will lose a life.

Whenever your character collects 100 rings, they will receive an extra life. Item boxes containing an extra life can sometimes be found in the action stages as well.

POINT MARKERS

You will find a number of point markers throughout each action stage that you can use to save your character's time and position within the course. If your character loses a life, the next life will start from the location of the last point marker touched with the time that was logged when the marker was originally touched. The exact time at which the point marker was touched is displayed briefly at the bottom right of the action stage display whenever a point marker is touched.

ADVENTURE MODE

EMBLEMS

Each time your character successfully clears an action stage you will receive a Sonic emblem. As the "goal" of each action stage is comprised of three levels, you can receive a total of 3 Sonic emblems per action stage. Additional Sonic emblems can also be found in both the mini-games and scattered about the adventure field. The total number of emblems you have collected is displayed in the file selection screen. For details, see p. 4.

GAME OVER & CONTINUE

Your character will lose one life if they sustain damage while not carrying any rings. Your character can also lose a life, even when carrying rings, if they fall off the action stage course or a cliff in the adventure field. The "Game Over" screen appears when the number of "extra lives" your character has reaches zero and they lose their last life. Select and enter "Continue" to restart* the game at the beginning of the same stage or "Quit" to return to the title screen.

GAME OVER

Continue Quit

*In action stages, boss battles or mini-games, your character will restart at the beginning of the stage.

*In the adventure field, your character will restart from the location where the character was when the game was last saved.

PAUSING THE GAME

Start = Pause, ↑ ↓ = Select, A = Enter,
B or X = Cancel

To "pause" the game during game play, press the Start Button and the pause window appears. Options available in the pause window vary according to the type of stage you are in when the game is paused. Refer this diagram and select an option from the pause window.

- ▼ **Quit** = Select to quit the game and return to the title screen.

There are two types of "items" that can be collected in Sonic Adventure™. A number of "Item Boxes" are located throughout the action stages as well as special "Level Up Items", that are hidden within the adventure field.

Be sure to take your parental responsibilities seriously for how you care for your Chao creatures will determine not only their physical development but also their personality, behavior and quality of life. **NOTE:** The time only flows in the Chao garden while a character is present. Whenever they leave the Chao garden, time stands still.

HOW TO RAISE CHAO CREATURES

Chao are hatched from eggs that can be found in Chao Gardens or the adventure field. The Chao life cycle spans three basic stages: Egg → Infancy → Maturity. To enhance its physical traits and abilities, your Chao creature can absorb the characteristics of the small animals rescued from the action stages. To do this, use the Y button to pick up and hold a small animal in front of your Chao. As the absorption takes place, your Chao creature will visibly transform. Chao will also undergo physical and

behavioral changes according to the food you provide and manner in which you treat it.

Once matured, your Chao can be bred with another mature Chao. This mating process will yield a new egg for you to hatch and raise. Such is the life span of a Chao!

PLAYING "CHAO ADVENTURE" USING YOUR VMU

Select a VMU and press the **A** Button. The Chao will automatically be transported to your VMU. When multiple VMUs are connected, you will need to select which VMU to use to hold your Chao.
